

Characteristics and Applications:

TM-56 is a solid wire for butt or fillet MAG welding of mild steel and 490N/mm² high tensile steel. Stable wire feeding is due to ~~25~~mm.

According to the purpose as the bead appearance and

2 or Ar + CO₂ gas mixture as shielding gas.

4. Control within the optimal range of welding conditions for this wire as possible.

SOLID WIRES

may produce different results.
